PREPARATION OF THE DIRECTORY

The 1994 edition of the Directory contains the names of woody plant physiologists in 65 countries. In this edition as in the last, we have made an effort to expand coverage of Africa, Central and South America, eastern Europe and Asia. Many woody plants important in these regions of the world have been added to the species lists. Every effort has been made to ensure accurate spelling of species names. If you find errors in species names, we would appreciate receiving the correct names and spellings so that they can be corrected in the next edition. We also would appreciate receiving printed copies of regional species lists, since ensuring correct spelling of species names is the most difficult and time consuming aspect of the compilation process. All corrections and correspondence concerning the Directory should be sent to Dr. Stephen B. Horsley, Forestry Sciences Laboratory, P. O. Box 928, Warren, PA 16365 USA.

Many people have helped prepare this Directory. Corinne Weldon deserves special thanks for her tireless effort in entering, checking and proofreading Directory entries. Wendy Snavley word processed numerous contact letters. Todd Ristau wrote the computer programs which were used for sorting the database. Many individuals helped us collect names of woody plant physiologists in countries throughout the world. These individuals also are due special thanks:

HOW TO USE THE DIRECTORY

The Directory is organized into four sections: an alphabetical world directory of woody plant physiologists, a list of woody plant physiologists by country, a list of woody plant physiologists by research interests, and a list of woody plant physiologists by important species with which they work.

1. The alphabetical world directory is the master list of information about each research worker. It is organized as follows:

Example

Last name, First name, Middle initial	Horsley, Stephen B.
Title	Plant Physiologist
Institution	USDA For Serv
Address	NEFES, For Sci Lab
Address	PO Box 928
Address	Warren, PA
Country, Postal Code	USA 16365
Country Code/City,Area Code/Telephone Number	Tel: 1 814 563 1040
Country Code/City,Area Code/FAX Number	FAX: 1 814 563 1048
E-mail Number	Email: /s=s.horsley/ou=S24L14A@fswa-mhs.attmail.com
Research Interest Codes (1-22)	Res Int: 22 1 6 7 16
Species Codes (1-1278)	Spp Int: 987 75 77 545 519 70 984

Woody plant physiologists from 65 countries are included in the Directory. A list of countries is found on page iv. Each research scientist was asked to choose his research interests from 22 research interest codes. These are listed on page iv. Furthermore, scientists were asked to list up to 10 important species with which they worked. A list of 1278 important species begins on page v.

2. The list of woody plant physiologists by country gives the last name, first name and middle initial of woody plant physiologists in that country who are included in the Directory. Scientist's names are listed alphabetically within each country and countries are listed alphabetically.
3. The list of woody plant physiologists by research interests gives the last name, first name and middle initial of woody plant physiologists working in that research interest area. A scientist's name may appear under several research interests. Names are listed alphabetically under each research interest.
4. The list of woody plant physiologists by important species with which they work gives the last name, first name and middle initial of woody plant physiologists under each woody plant with which they work. Scientist's names are listed alphabetically under each plant name and plant names are listed alphabetically. Plant names are given in Latin by genus and species. For some plant groups, the genus name also is listed. For example, the genus name Pinus is listed at the beginning of the list of Pinus species found in the Directory.
